Risk Factors	Data Sources	Summary of Findings	Emerging trends
<ul style="list-style-type: none"> • <i>School Mobility Rate</i> 	<p>Ohio Department of Education School Mobility Report.</p>	<p>GED.) Nationally, three and one-half of every 100 students who were enrolled in public or private high schools in October 2006 left school before October 2007 without completing a high school program. There is no measurable difference in the 2007 event dropout rates for males and females (same pattern over 30 years); Hispanic students in public and private high schools were more likely to drop out (6.0 percent) than were White students (2.2 percent) – between October 2006 and October 2007; In 2007, the event dropout rate of students living in low-income families was about 10 times greater than the rate of their peers from high-income families (8.8% vs. 0.9%); Students who pursued a high school education past the typical high school age were at higher risk than others of becoming an event dropout; in 2007, no measurable differences in the event dropout rates for public and private high school students were apparent by region.</p> <p>Status Dropouts: (a percentage of individuals in a given age range who are not in school and have not earned a high school diploma or equivalency credential.) In October 2007, approximately 3.3 million 16 through 24 year olds were not enrolled in high school and had not earned a high school diploma or alternative credential. Males ages 16-24 were more likely than females to be high school dropouts in 2007 (9.8 percent vs. 7.7 percent); The status dropout rates of Whites (5.3 percent) and Asian/Pacific Islanders (6.1 percent) were the lowest among the racial/ethnic groups. The Black status dropout rate was 8.4 percent, followed by the Hispanic rate (21.4 percent); Status dropout rates for Whites and Hispanics varied by sex. Among White students, 6.0 percent of males were status dropouts in 2007 compared with 4.5</p>
